## The Nebbiolo Veranda

*Slim, elegant and very competitively priced*

The Nebbiolo veranda has a heavier construction than customary within this price range, which makes the Deponti Nebbiolo excel in quality and price. The intermediate beams are fitted with aluminium top frames instead of rubbers, making the veranda sturdy and robust. Still you wouldn't be able to tell from the look of the Nebbiolo; the design of the Nebbiolo is slim, elegant and timeless.

## Enjoy special moments sheltered from the forces of the weather.

With the Nebbiolo you will experience your garden as you would like to experience your garden. All this under a slim, elegant and timeless design.

This veranda is available in standard widths of 4, 5 or 6 meters. The roof is equipped with a polycarbonate roof; high-quality and durable material with a timeless appearance.

### DETAILS

Colours (profiles)	RAL9001 / RAL7024
Gutter	Standard half-round
Posts	Square
Roofing	Polycarbonate (Opal / Clear / Ultra clear / Solar control)
Width (mm)	4045 / 5045 / 6045

As an added option, the Nebbiolo can be expanded with various accessories of Deponti, such as a side wall, LED lighting or side panel.

## The Bosco Veranda

*Our “bestseller”, choose your own look!*

The Bosco is an aluminium veranda with a very high level of finish. In addition, the Bosco has a wide range of choices, such as the finish of the decorative gutter front and the look of the uprights. You can tune the Bosco entirely to your style, taste and preferences. This gives you the perfect match with your home and garden.

## The Bosco veranda is flexible in design, making it perfect for every outdoor situation

The Bosco has the best price-quality ratio in the market, making it our best-selling model. The success of the Bosco lies in the optimal freedom of choice the product offers in the field of looks and possibilities. Because of our modular system, the possibilities with the Bosco are endless and suitable for every situation and every style. This veranda is interlinkable, meaning that the Bosco can be made as wide as you want.

## **The Giallo Veranda**

*Beautifully smooth & robust*

The Giallo Veranda is known for its smooth, robust look and is equipped with a reinforced gutter profile. Because of this extra reinforcement the Giallo can be mounted with just two posts with a span of 6 metres. The maximum span on two posts is what makes the Giallo unique. The result is maximum enjoyment with a free and open view.

***The Giallo is extra strong, meaning that it can be made with just two posts, with a span up to six metres!***

The robust & smooth aluminium veranda provides a solid and stylish extension to your home. The Giallo is available in four RAL colours. The veranda comes with a standard polycarbonate roof in which you can choose from various types depending on your wishes.

## The Pigato Veranda

*Elegant and affordable luxury veranda*

Introducing the Pigato, an elegant and affordable luxury veranda crafted from high-end aluminum with a robust steel-reinforced gutter profile. This sophisticated addition to your home boasts a safety glass roof, allowing for an uninterrupted view of the sky, trees, birds, or stars, bathing your veranda in natural light and creating an ambiance of pure luxury.

### ***Why choose the Pigato for your home?***

Revel in a luxury aesthetic with laminated clear glass roofing. Customize your veranda by extending its width to suit your preferences. Experience an absolute enhancement to your backyard ambiance.

**Revel in a luxury aesthetic with laminated clear glass roofing transforming your backyard into a haven of sophistication and charm.**

The Pigato is offered in standard widths of 4, 5, 6, and 7 meters, and its extendable design allows you to tailor the width to your preferences. With depths ranging from 2.5 to 4 meters, this veranda is a customizable retreat available in a range of colors. Choose between a round or classic decorative gutter and opt for half-round or square posts to personalize your space further.

For added versatility, enhance your Pigato with optional accessories such as a side gable, side wall, glass sliding doors, or LED lighting - details available in our accessories section.

## The Ribolla Veranda

*Exceptional detached veranda*

Presenting the Ribolla, an exceptional detached veranda designed for ultimate versatility and aesthetic appeal. With various colour and customization choices, the Ribolla offers a unique outdoor experience tailored to your preferences.

### ***Why choose the Ribolla for your home?***

Can be placed anywhere in your backyard for ultimate flexibility.  
Offers a customizable configuration to match your preferences.  
Abundance of optional accessories to enhance your outdoor experience.

## Experience the freedom to create a covered terrace anywhere in your backyard

Choose between round or Victorian gutters, square posts, and a polycarbonate roof available in Opaque, Clear, Ultra Clear, or Solar Control options. The Ribolla comes in widths of 4060, 5060, and 6060 mm, with depths ranging from 2500 to 6000 mm.

Experience the freedom to create a covered terrace anywhere in your backyard with the Ribolla. Unlike traditional verandas, the Ribolla is entirely independent, allowing you to position it at the end of your garden, by the pond, or next to the pool for optimal enjoyment. Its flexible configuration includes a closed rear wall, one closed side wall, or a side wall with an ultra-clear polycarbonate window and a railing on one side.

## Verdeca / Folding roof

*Ultimate flexibility with a sleek design*

Enjoy extra living pleasure in the garden through ultimate flexibility. Who would not want that? The Verdeca roof canvas is made of a sun-resistant and water-resistant fabric. Are you sitting under this veranda and want to enjoy the sun? Then, with one push on the button, raise the canvas (partially) so you can immediately enjoy maximum light and the beautiful weather. If you prefer to sit in the shade or seek protection against wind, rain or UV radiation, you can close the screen with the same ease.

By adding glass sliding walls you can choose to extend your Verdeca veranda to a complete garden room. With the flexible Verdeca veranda, you can therefore enjoy optimum comfort at your terrace.

The Verdeca veranda has a white water-repellent canvas and a grey colored frame from aluminium. In addition, the special geometric design ensures that the interior construction offers maximum strength and wind resistance to the aluminium profile.

The veranda looks sleek and offers perfect visibility because the stainless steel connection elements and screws are concealed invisibly. In addition, the rain gutter is equipped with an anti-draft system, which prevents the wind from entering between the canvas, the rails and the rain gutter.

#### Integrated LED lighting in the beams

Optionally, we have integrated dimmable LED light lines in the canvas. This way you can easily switch between practical, bright and atmospheric low beam lighting.

#### Effortless drainage of water

Rain water dripping down from the front? Not with the Verdeca veranda! The smart IDS (Integrated Drainage System) ensures invisible drainage of rainwater through the uprights at the front.

#### 100% water-repellent

The foldable canvas is 100% waterproof.

#### 6-wheel system

The innovative 6-wheel system carries the fabric up and down over the rail, silently, quickly and in a well-balanced way.

#### DETAILS

Aluminium colour	RAL7024
Canvas colour	White
Control	The Verdeca canvas and optional LED lighting can be controlled with the supplied SOMFY remote control.
Width (mm)	4000 / 5000 / 6000
Projection (mm)	3000 / 3500 / 4000

#### ADDITIONAL OPTIONS

Optional	Built-in LED lighting in the canvas
Optional	Glass sliding walls

## **Pinela Deluxe / Aluminium Louvered Roof**

*The convertible effect in your garden*

Would you like to have an open space above your terrace in no time? With the push of a button, you can open the roof panels of the Pinela Deluxe and create a convertible effect in your garden.

In the open position, the pergola offers maximum light. At the same time, in a closed position the Pinela Deluxe protects against various weather conditions and offers you a shady spot on sunny days. Rain or shine, you will experience the ultimate outdoor living feeling.

With the Pinela Deluxe you can create an outdoor space that offers protection against all types of weather. When you open the synchronously moving panels, a large space is created above your terrace. When closing, the panels simultaneously press on the gaskets of the side profiles providing optimal protection.

#### Automatic operation

You can control the roof of the pergola with one push on the remote control of the Somfy system.

#### Effortless drainage

The water on the panels is led to the gutter and then drained effortlessly.

#### Optimal light

When the panels are fully opened, you will experience optimal light.

#### Protection

The panels close with a synchronous movement on the side profiles, which guarantees optimum protection.

#### DETAILS

Colours	RAL7024
Panels	The panels are retractable to create an open space above your terrace. The panels of the Pinela Deluxe and the optional LED lighting can be controlled with the supplied SOMFY remote control.

Projection (mm)	3014 / 3571 / 4128 / 4964 / 6078

#### ADDITIONAL OPTIONS

Optional	LED lighting strip
Optional	Glass sliding walls

## **Glass Sliding Doors**

*Enjoy your garden all year round*

With our versatile and functional sliding glass doors you'll enjoy your garden buildings and veranda throughout the year. When the weather is great enjoy your outdoor space by repositioning your sliding glass doors. When the temperature drops you can change your veranda to a fully enclosed area by closing the sliding doors. This offers you the possibility to stay outside longer. The sliding glass doors offer benefits all year round, meaning you can always enjoy the best at home.

These doors can be added to verandas, garden rooms, terraces and summer houses to make the most of your outdoor living space.

## ***Sliding glass doors provide you with shelter and space.***

If you want to enjoy the outdoors longer, glass doors provide extra shelter against wind and rain. As a result, you'll always have enough light and a great view of your back garden. Moreover, our glass doors are not only a suitable addition to your veranda but also to shield your porch, garden house, cabin or balcony.

The glass panels are available in various height and width dimensions, they can run on 2 to 6 rail tracks with no additional frame. This gives you a permanent, unrestricted view you can enjoy all year round.

### **DETAILS**

Colours (profiles)	RAL9016 / RAL9001 / RAL7024 / RAL9005 / Uncoated
Panel width (mm)*	640 / 820 / 980 / 1040
Glass thickness (mm)	10
Number of tracks	2 / 3 / 4 / 5 / 6-track rails
Installation height (mm)*	2000 / 2100 / 2150 / 2200 / 2250 / 2300 / 2400 / 2500

*\* Deviating dimensions are also available on request.*

The glass sliding walls can be expanded with various glass wall accessories, such as handles and carriers.

## Aluminium Panels

*The perfect basis for your creativity*

Aluminium panels are unique in our product range. These are lightweight, aluminium parts that enrich your outdoor life. The panels are stackable, easy to assemble and fitted with click profiles. The durable and flexible character ensures that you can use the aluminium panels in different ways. They can serve as fence parts for more privacy, or as fencing. But you can also make planters or a beautiful aluminium conversion for your garbage container. Even creating a garage door is possible. In short: your creativity will be fully stimulated with our aluminium panels.

## ***The durable and flexible character of the panels offers endless possibilities***

The aluminium panels are available in four different RAL colours. This makes the panels a perfect addition to your roof. For example, you can close the side or back wall completely, in style with your veranda, for shelter and protection from the wind. You can also close the bottomside of your veranda for a nice look.

The adaptable character of the panels is comparable to the possibilities offered by wood. What you can achieve with wood, you can also build with these panels, only more durable with low maintenance. With the panels you enjoy endless possibilities to give your outdoor life a unique look.

# WHAT A TRANSFORMATION

BEFORE

AFTER

## THE BUDGET LOOK

As the home owner, one of your many priorities might just be: to make your home look and feel gorgeous without spending a fortune

### WHAT'S THE PRICE DIFFERENCE?

In one of our recent projects we had a client who wanted to checkout what a **"DOORLESS" canopy would look like in comparison to enclosed one.**

The **price was basically more than doubled.**

### OUR RECOMMENDATION

For this reason we suggest that you go for an open canopy first and then if you really wish to enclose it you can do so later.

### ENCLOSED IS BETTER

Although in the end it all comes down to preference.

A lot of our clients did end upcoming back and ordering doors for their canopy.

# WHAT TYPE OF VERANDA WILL SUIT YOU

We can offer a host of solutions to suit your particular site and preferences. Most of the verandas we fit have some degree of customisation to suit the particular site. We will look at some of the most common formats used.

## OPEN SIDED

In their simplest form, our verandas are open sided (open on 3 sides) , consisting of a roof abutted onto a house wall, and projecting up to 6m out from the building. A reinforced gutter at

the lower veranda front is supported by a series of posts attached to the ground. Rain water from the veranda roof is fed into a downpipe , concealed within one of the support posts.

## VERANDA IN CORNER

Here is an example of a Veranda fitted in a corner, This could be left open sided or could be

closed in at a later date with a combination of Aluminum Wall and sliding glass panels.

## FULL POLYCARBONATE WALL

This veranda is fitted in a corner and has one of its ends fitted with polycarbonate panels. In this case it is Opal (opaque) Polycarbonate , but

could also be either clear polycarbonate panel or Ultra - Clear panels for greatest transparency.

## FULL ALUMINIUM PANEL

We can enclose a complete side of a veranda with a solid aluminum wall, color matched to

the veranda structure colour. This created complete shelter and privacy.

## HALF & HALF VERANDA FRONT

Here is an example of a 4m x 4m Bosco veranda installed in a corner with one side closed off to create additional shelter. This wall is aluminum

panel on the bottom and Ultra Clear polycarbonate sheeting on the top.

## HALF & HALF VERANDA SIDEWALL

Here is an example of a veranda sidewall fitted with 1/2 and 1/2 Ultra Clear polycarbonate panel and Aluminum sidewall.

## SIDEWALL partial sliding glass panels

Here the "walk-in" height at the gutter is 1.8m. This 3.7m wide sidewall consists of a 2.5m wide Sliding Glass Panel set (2m high) and a 1.2m

wide Solid aluminum panel wall. Note the gutter downpipe exits the corner support post at a height convenient for a water butt.

# CARPORT

Here , a veranda open on all 3 sides serves as a carport. The veranda can project up to 6m out from a building . A carport can be a great addition to a house, particularly when

positioned to shelter an entrance. It will really be appreciated when you bring the weekly shopping home and when departing or arriving home when it's raining.

# ALTERNATE ROOF SUPPORT

In most cases, our verandas are fitted onto your building, where the veranda backplate abutts onto your house wall and the lower front end of the veranda (where the veranda gutter is) is

supported by vertical posts attached to the ground. In some cases , where this is not possible, the veranda roof is instead supported by custom made suitable wall brackets.

## PARTIALLY ENCLOSED VERANDA

We can create a "Glass Room" on all or part of your veranda. In this example, a portion of the veranda retains its open sides, while a section walled off with sliding glass panels creates a "Glass Room". Note that the "wedge" on top of the enclosed veranda sidewalls is solid

aluminum panel (color matched to the veranda structure color). Alternatively, this "wedge" positioned above the sliding glass panels on the veranda endwalls could be of polycarbonate panel. ( either Opal or clear )

## SUPPORT POST POSITIONING

In most cases , the veranda front roof support posts are positioned at both front corners. The total number of front support posts fitted will depend upon the length of the veranda. In this case ,one of the front corner support posts is

positioned 1 m in from the end of the roof , allowing it to be fitted on the raised platform area and the roof to extend unsupported for 1 m. Also, the gutter downpipe can be seen exiting at the bottom of the corner support post.

# RIBOLLA FREESTANDING UNIT

incorporating existing walls

This 4m x 4m Ribolla Unit was built on a corner site, with aluminum panel walls and

incorporating the existing, partial height wall on two sides.

# RIBOLLA FREESTANDING extra Sliding Glass panels

Here is an example of a 4m x 4m Ribolla freestanding veranda with extra sliding glass panels fitted. In this case, as well as having the front and left sidewall as sliding glass panels, 1/2

of the 4m backwall is also Sliding Glass panels. (the other half of the backwall is solid aluminum panel)
